

JubileeOutlook Feature Status Report

Project: JubileeOutlook Email Client

Version: 1.4.0

Date: January 14, 2026

Platform: WPF / .NET 9.0

Architecture: MVVM with CommunityToolkit.Mvvm

SECTION 1: COMPLETED FEATURES

1.1 Email Module

Folder Navigation & Display

- ✓ Hierarchical folder structure with expandable/collapsible folders
- ✓ Account root folder with WWBW email address support
- ✓ Standard folders: Inbox, Sent Items, Drafts, Deleted Items, Junk Email
- ✓ Unread count badges on folders with dynamic updates
- ✓ Folder selection with gold highlight styling
- ✓ Folder expansion/collapse state management

Message Listing & Selection

- ✓ Message list display with sender, subject, preview text, and received date
- ✓ Click-to-select functionality with automatic reading pane display
- ✓ Unread message indicator (cyan dot) with proper positioning
- ✓ Flagged message indicators
- ✓ Message sorting by date (most recent first)
- ✓ Read/unread status tracking with visual distinction (bold text for unread)

Reading Pane

- ✓ Full message preview with formatted headers
- ✓ Display of From, To, Cc fields
- ✓ Received date and time display

- ✓ Message body rendering (supports plain text)
- ✓ Attachment list with file details (name, size, download buttons)
- ✓ Gold-colored folder heading for visual consistency
- ✓ Blank state on initial app load (no auto-selection)
- ✓ Clears when compose window closes or mail is sent

Message Operations

- ✓ Mark as read/unread functionality
- ✓ Delete message (move to deleted folder)
- ✓ Move message between folders
- ✓ Flag/unflag messages
- ✓ Search functionality with full-text support
- ✓ Reply, Reply All, and Forward operations
- ✓ Archive functionality

1.2 Email Composition

Compose Mail Window

- ✓ Dark-themed compose window (#1A1A1A background)
- ✓ Editable From field (pre-populated)
- ✓ To, Cc, Bcc fields with show/hide toggles
- ✓ Subject line input
- ✓ RichTextBox message body editor with FlowDocument support
- ✓ Gold Send button with validation

Rich Text Formatting Toolbar

- ✓ Bold formatting (Ctrl+B)
- ✓ Italic formatting (Ctrl+I)
- ✓ Underline formatting (Ctrl+U)
- ✓ Text alignment: Left, Center, Right
- ✓ Bullet list support
- ✓ Numbered list support
- ✓ Toggleable toolbar visibility
- ✓ Keyboard shortcuts support

Advanced Composition Features

- ✓ Hyperlink insertion with dark-themed dialog and URL validation

- ✓ Inline image insertion with 600px max width and aspect ratio preservation
- ✓ Multi-file attachment support with visual cards showing filename/size
- ✓ Remove attachment functionality
- ✓ File size formatting (B, KB, MB, GB)
- ✓ Email validation (To, Cc, Bcc fields)
- ✓ Form clearing after send

1.3 Calendar Module

Calendar Views

- ✓ Day view: Single day with hourly time slots
- ✓ Work Week view: Monday-Friday with time grid
- ✓ Week view: Full 7-day week (Sunday-Saturday)
- ✓ Month view: Monthly calendar grid with 6-week display
- ✓ View switching buttons with working state management
- ✓ Dynamic date range display in header

Calendar Navigation

- ✓ Previous/Next period navigation
- ✓ "Go to Today" button
- ✓ Real-time system date detection
- ✓ Mini calendar with month/year display
- ✓ Calendar days marked with IsToday flag
- ✓ Month view days collection (42 cells for 6x7 grid)

Event Creation & Editing

- ✓ New event window with comprehensive options
- ✓ Event title with required field validation
- ✓ Date and time selection via DatePicker and dropdowns
- ✓ Start/End time validation (end must be after start)
- ✓ All-day event toggle
- ✓ Location field with in-person toggle
- ✓ Double-click event editing across all calendar views
- ✓ Edit mode window support with "Edit event" title
- ✓ Load event data for editing (all fields populate correctly)
- ✓ Delete button in edit mode
- ✓ Save/Delete button direct click handlers
- ✓ Event ID preservation during updates

Event Properties

- ✓ Event title display
- ✓ Event time range ("HH:mm - HH:mm" or "All day")

- ✓ Location display
- ✓ Event color based on category
- ✓ Reminder/status display
- ✓ Private event masking (shows "Private" instead of actual details)
- ✓ Description field for rich text notes

Event Status & Categories

- ✓ Status dropdown: Free, Working elsewhere, Tentative, Busy (default), Out of office
- ✓ Color-coded status indicators
- ✓ Private event toggle - masks subject, location, and description
- ✓ Private events display in gray (#808080)
- ✓ Category dropdown with 6 color options (Blue, Green, Orange, Purple, Red, Yellow)
- ✓ Color-coded tag icons
- ✓ New/Manage category options

Reminders

- ✓ Reminder dropdown with 10 options
- ✓ Don't remind me
- ✓ At time of event
- ✓ 5, 15 (default), 30 minutes before
- ✓ 1, 2, 12 hours before
- ✓ 1 day before, 1 week before
- ✓ Reminder selection persists with event data

Event Images & Attachments

- ✓ File picker dialog for multiple image formats (jpg, jpeg, png, gif, bmp)
- ✓ Image display as thumbnails in WrapPanel layout
- ✓ Remove image command
- ✓ Image persistence with event data
- ✓ File attachments with size formatting
- ✓ Add/remove attachment commands
- ✓ Multi-file selection support

Event Display & Positioning

- ✓ Event colors based on category selection
- ✓ Dynamic event positioning on time grid (60px per hour)

- ✓ Dynamic event height calculation based on duration
- ✓ Event rendering across multiple calendar views
- ✓ Event filtering by date for day columns
- ✓ Time slot grid display (24 hours, 00:00-24:00)
- ✓ Green event preview block in new event window

1.4 UI/UX Features

Dark Theme

- ✓ Pure black background (#000000)
- ✓ White primary text (#FFFFFF, #EEEEEE)
- ✓ Gold accent colors (#E6AC00, #FFD700, #B8860B)
- ✓ Gray secondary text (#B3B3B3, #999999)
- ✓ Consistent styling across all windows
- ✓ Fluent.Ribbon color overrides for ribbon controls

Layout & Navigation

- ✓ 3-pane layout: Folders, Message List, Reading Pane
- ✓ Resizable columns with GridSplitter controls
- ✓ Collapsible folder panel with hamburger menu
- ✓ 300ms smooth animation for panel toggle
- ✓ Animated accent bar at bottom (gold wave sweep)
- ✓ AppRailControl vertical navigation with profile button
- ✓ Window state persistence (position, size, maximized state)
- ✓ Multi-monitor support with taskbar-aware maximize

Module Navigation

- ✓ Mail module
- ✓ Calendar module
- ✓ People module (UI only)
- ✓ Tasks module (UI only)
- ✓ More Apps section

1.5 Architecture & Infrastructure

- ✓ MVVM pattern with CommunityToolkit.Mvvm
- ✓ Service abstraction layer (IMailService, ICalendarService)
- ✓ Observable collections and property bindings
- ✓ ViewModel hierarchies (MainViewModel, CalendarViewModel, ComposeMailViewModel, NewEventViewModel)
- ✓ Dark theme resource dictionary
- ✓ Win32 interop for taskbar-aware maximize

- 
- ✓ Window state persistence (JSON serialization)
 - ✓ Service configuration factory pattern
 - ✓ Mock data services for testing

SECTION 2: PARTIALLY IMPLEMENTED FEATURES

2.1 API Services

Feature	Current State	Remaining Work
ApiCalendarService	HTTP client ready, endpoints defined	Connect to live InspireContinuum API
ApiMailService	Interface defined only	Full implementation needed
ServiceConfiguration	Toggle exists	Environment variable integration

2.2 Ribbon Commands (Empty Stubs)

Command	Status
NewFolder	Empty stub
RenameFolder	Empty stub
DeleteFolder	Empty stub
CleanUpFolder	Empty stub
RecoverDeletedItems	Empty stub
WorkOffline	Empty stub
DownloadAddressBook	Empty stub
CreateRule	Empty stub
QuickStep	Empty stub
ApplyCategory	Empty stub
PrintMessage	Empty stub
ShareCalendar	Empty stub
SetRecurrence	Empty stub
ChangeTimeZone	Empty stub

SetImportance	Empty stub
SetFollowUp	Empty stub
ScheduleDelivery	Empty stub
RequestReceipt	Empty stub
InsertSignature	Empty stub

2.3 Value Converters (Not Implemented)

22 converters defined in `Converters.cs` but throw `NotImplementedException`:

- BoolToVisibilityConverter
- InverseBoolToVisibilityConverter
- CountToVisibilityConverter
- ReadToWeightConverter
- ListToStringConverter
- NullToVisibilityConverter
- IsTodayConverter
- IsTodayToBackgroundConverter
- IsTodayToForegroundConverter
- IsTodayToFontWeightConverter
- EventHeightConverter
- EventsForDayColumnConverter
- StringToVisibilityConverter
- EventTopPositionConverter
- EventsByDateConverter
- EventColorConverter
- And more...

2.4 Authentication

Component	Status
AuthenticationManager	Class exists, not integrated
SecureStorageService	DPAPI encryption ready, unused
Auth Models	Defined but not used

SSO endpoint	Configured but not connected
--------------	------------------------------

SECTION 3: PENDING / NOT IMPLEMENTED FEATURES

3.1 Email Backend Integration

Feature	Priority	Description
IMAP/SMTP Integration	HIGH	Real email sending/receiving
Microsoft Graph API	MEDIUM	Office 365 integration
Exchange Web Services	MEDIUM	Enterprise Exchange support
Multi-account Support	HIGH	Multiple email accounts
Account Configuration UI	HIGH	Settings for mail servers
Email Sync	HIGH	Server synchronization
Push Notifications	MEDIUM	Real-time email alerts
Offline Mode	MEDIUM	Local cache with sync

3.2 People/Contacts Module

Feature	Priority	Description
Contact List Display	HIGH	View all contacts
Contact Creation	HIGH	Add new contacts
Contact Editing	HIGH	Modify contact details
Contact Deletion	HIGH	Remove contacts
Contact Search	MEDIUM	Find contacts quickly
Contact Groups	MEDIUM	Organize contacts
Contact Import/Export	LOW	vCard support
Contact Sync	MEDIUM	Sync with server

3.3 Tasks Module

Feature	Priority	Description
Task List Display	HIGH	View all tasks
Task Creation	HIGH	Create new tasks
Task Editing	HIGH	Modify task details
Task Deletion	HIGH	Remove tasks
Task Categories	MEDIUM	Organize by category
Task Priorities	MEDIUM	High/Medium/Low
Task Due Dates	HIGH	Deadline tracking
Task Reminders	MEDIUM	Notification alerts
Task Sync	MEDIUM	Sync with server
Recurring Tasks	LOW	Repeat schedules

3.4 Database Integration

Feature	Priority	Description
Continuum PostgreSQL Connection	HIGH	Database connectivity
Calendar Persistence via API	HIGH	Save events to database
Email Persistence via API	HIGH	Store emails in database
Contact Persistence	HIGH	Store contacts
Offline SQLite Cache	MEDIUM	Local data storage
Data Migration	LOW	Import existing data

3.5 Authentication & Security

Feature	Priority	Description
Jubilee SSO Integration	HIGH	Single sign-on
OAuth2/OIDC Flow	HIGH	Secure authentication

Token Refresh	HIGH	Session management
Secure Token Storage	HIGH	DPAPI encryption
Multi-factor Authentication	MEDIUM	2FA support
Session Timeout	MEDIUM	Auto logout

3.6 Advanced Email Features

Feature	Priority	Description
Conversation Threading	MEDIUM	Group related emails
Email Signatures	MEDIUM	Custom signatures
Rules and Filters	MEDIUM	Auto-organize emails
Spell Checking	LOW	In-compose spell check
Read Receipts	LOW	Delivery confirmation
Email Templates	LOW	Reusable templates
Email Scheduling	LOW	Send later
Email Encryption	LOW	S/MIME support

3.7 Advanced Calendar Features

Feature	Priority	Description
Real-time WebSocket Sync	MEDIUM	Live updates
External Calendar Sync	LOW	Google, Outlook.com
Meeting Invitations	MEDIUM	Send/receive invites
Room Booking	LOW	Resource scheduling
Availability View	MEDIUM	Free/busy lookup
Calendar Sharing	LOW	Share with others

3.8 UI/UX Enhancements

Feature	Priority	Description
Light Theme Option	LOW	Alternative theme
System Notifications	MEDIUM	Desktop alerts
Customizable Layout	LOW	User preferences
Accessibility Features	MEDIUM	Screen reader support
Keyboard Navigation	MEDIUM	Full keyboard control
Touch Support	LOW	Tablet optimization

SECTION 4: SUMMARY

Feature Counts

Category	Count
Fully Implemented	95+ features
Partially Implemented	6 areas (45+ items)
Pending/Not Started	50+ features

Module Completion Status

Module	Completion %	Status
Email UI	90%	Nearly Complete
Email Backend	10%	Needs Work
Calendar UI	95%	Nearly Complete
Calendar Backend	30%	In Progress
People/Contacts	5%	Not Started
Tasks	0%	Not Started
Authentication	15%	Needs Work
Database Integration	20%	In Progress

Priority Recommendations

Phase 1 - Core Backend (High Priority)

1. Jubilee SSO Authentication
2. InspireContinuum API Connection
3. Calendar Persistence
4. Email Persistence

Phase 2 - Complete Modules (Medium Priority)

1. People/Contacts Module
2. Tasks Module
3. Real Email Integration (IMAP/SMTP)
4. Implement Value Converters

Phase 3 - Enhancements (Lower Priority)

1. Advanced Email Features
 2. External Calendar Sync
 3. UI Themes
 4. Offline Mode
-
