

WPF Outlook Clone - Email Synchronization Execution Plan

Objective: Build a WPF .NET Outlook-style email client with automatic provider detection and synchronization.

Step 1: User enters Email ID

Step 2: Provider Detection (Google, Microsoft, Generic IMAP)

Step 3: Authentication using OAuth2 or Password fallback

Step 4: Secure IMAP / Graph connection validation

Step 5: Folder discovery and mapping

Step 6: Initial Email Synchronization

Step 7: Incremental Synchronization

Step 8: Local Database Schema

Step 9: Sync Coordinator & Background Service

Step 10: Security Best Practices
